

One and only one
customer can buy one
or many tickets

You can buy multiple
tickets for one movie at
a time. cant watch two
movies at once

ideally, the relationship
between customer and
sales ticket is one
customer can have
zero to multiple sales
tickets (they may not
buy any concessions)
and one sales ticket
can have one or
multiple concessions .
Although I made it a
little different in my
database becuae i am
not sure how to put
multiple items on one
sales ticket lol
